

Directions for ordering the document, ***Baseline Threat Information for
Vulnerability Assessments of Community Water Systems***
(Baseline Threat Document)

The Baseline Threat Document provides an overview of threats, methodologies, and strategies for water utilities to consider as they develop vulnerability assessments, but it is not a blueprint for developing a vulnerability assessment.

All community drinking water systems that serve more than 3,300 people are eligible to receive a copy of the document by following the steps outlined below.

1. Write a letter requesting a copy of the Baseline Threat Document on your organization's letterhead stationery. Address it to Brian Frazer of EPA's Water Security Division. The letter should be signed by the community water system manager or person at a similar authority level.
2. Fax your letter along with the completed form below to the attention of Brian Frazer. The fax number is: 202-564-8513.
3. Provide the following information on the water utility and individual designated to receive the document:

Name (printed): _____
Name (signature): _____
Title: _____
Organization: _____
Phone: _____
E-mail: _____
Public Water System Identification # _____
(PWS ID)

4. If you are not able to send it by fax you may send it by mail, but there will be a significant delay since all mail is irradiated. The mailing address is: Environmental Protection Agency, Attn: Documents, Room 2104A EPA East, 1201 Constitution Ave. NW, Washington DC, 20004.
5. You will receive the document by U.S. mail within approximately two weeks.

For questions about the document, e-mail Brian Frazer (frazer.brian@epa.gov) or Susan Dolgin Ruggles (ruggles.susan@epa.gov) with EPA's Water Security Division.
